

Part 2

Background research

By Anthony Testa

1. Source:

<https://blog.aem.eco/leading-weather-stations-software-for-professional-and-personal-use>

Context: Software is very important when it comes to integrated systems. This is relevant in talking about different softwares to use including comparisons. As well as different design options.

2. Source:

<https://www.toptal.com/c/how-i-made-a-fully-functional-arduino-weather-station-for-300>

Context: a homemade weather station documented by engineer Francisco Clariá. In his works he talks about ways to keep costs down as well as design elements to prevent theft.

3. Source: <https://www.youtube.com/watch?v=WyVdNr06Iy0>

Context: Highly recommended weather stations solutions. It shows common designs used and how companies integrated ease of use to the designs. This can make the customer more confident in using the device. As well as different ways to display information.
